ABOUT COMPANY AND PIPELINE OVERVIEW REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information. From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurate and validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

Cortellis Company and Pipeline Overview reports are the first in a series of reports that track pharmaceutical and biotechnology companies worldwide. Further report offerings planned to follow include: Company Detailed Pipeline and Company Competitive Landscape reports. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from over 400 global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence*

DISCLAIMER

The information contained in this report is based on sources believed to be correct but Thomson Reuters does not guarantee the accuracy, timeliness, or completeness of this information. Opinions, if any, are those held by the author of any individual report or article at the time of initial publication and do not necessarily reflect the views of Thomson Reuters.

Information in this report on companies is intended for reference use only, and does not constitute a recommendation to buy or sell any particular security or other investment and does not constitute an offer to buy from or sell to any particular investor. Any company or securities mentioned in this report may not be suitable for any particular investor, depending on that investor's financial position and needs.

GLOSSARY

Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Ambit Biosciences Corp

COMPANY OVERVIEW

Company Name	Ambit Biosciences Corp
Parent Company Name	Ambit Biosciences Corp
Website	http://www.ambitbio.com/
Country	US
Number of Drugs in Active Development	4
Number of Inactive Drugs	10
Number of Patents as Owner	40
Number of Patents as Third Party	1
Number of Deals	10
Key Indications	Cancer, Inflammatory disease, Autoimmune disease, Solid tumor, Acute myelogenous leukemia, Breast tumor, Leukemia, Insulin dependent diabetes, Myeloproliferative disorder, Acute Lymphoblastic leukemia, Multiple sclerosis, Psoriasis
Key Target-based Actions	CSF-1 antagonist, Jak2 tyrosine kinase inhibitor, Flt3 tyrosine kinase inhibitor, Kit tyrosine kinase inhibitor, PDGF receptor antagonist, Aurora protein kinase 2 inhibitor, ErbB4 tyrosine kinase receptor inhibitor, ABL family tyrosine kinase inhibitor, Protein kinase inhibitor, Raf B protein kinase inhibitor, VEGF-2 receptor antagonist
Key Technologies	Small molecule therapeutic, Oral formulation, Oral liquid formulation, Crystalline form, Salt synthesis, Antibody, Drug combination, Drug screening, Fluorescence, Formulation preservation, Intravenous

COMPANY PROFILE

SUMMARY

Ambit Biosciences, based in San Diego, CA is a privately held biopharmaceutical company focused on the discovery and development of small molecule kinase inhibitors for cancer and other diseases. The company identifies and manufactures these molecules using its kinase profiling platform technology, KinomeScan.

COMPANY LOCATION

The company is based in San Diego, CA. It also has a research facility based in Toronto, Canada.

LICENSING AGREEMENTS

In November 2006, Ambit agreed to screen, discover and develop kinase inhibitors with Cephalon using its KinomeScan technology and Cephalon's kinase libraries. Cephalon would pay Ambit \$18 million upfront and make milestone payments up to \$232.5 million plus royalties. The companies also planned to advance two programs targeting undisclosed kinases.

In December 2005, Ambit and Bristol-Myers Squibb (BMS) expanded their collaboration to discover kinase inhibitors. The new, 5-year agreement provided BMS with access to Ambit's kinase profiling technology, KinomeScan, to accelerate its internal drug discovery and development efforts. Ambit received a license to a BMS preclinical kinase inhibitor program for the treatment of solid tumors. Ambit would also get an upfront payment, equity investment and profiling revenue from BMS. In January 2004, Ambit entered into separate kinase screening collaborations with Bristol-Myers Squibb Co and GlaxoSmithKline plc, whereby Ambit would employ its kinase platform to characterize the specificity of certain compounds from the companies' compound libraries. Ambit also entered into a compound profiling agreement with Pfizer Inc's La Jolla Laboratories. Ambit would employ its Reverse Screening technology to identify and characterize the protein targets of certain Pfizer drug discovery compounds and therefore elucidate their molecular mechanisms of actions.

In August 2004, Roche Holding AG and Ambit entered into a multiyear collaboration. Roche would use Ambit's kinase screening platform to profile and select small-molecule kinase inhibitors. Ambit would receive milestone payments and royalties on drugs developed through the collaboration.

[Return to Table of Contents](#)

In March 2003, Ambit signed a technology evaluation agreement with GlaxoSmithKline (GSK) to characterize small molecule kinase inhibitors using Ambit's ProteomeScan platform.

In April 2002, Ambit entered into a research collaboration agreement with AstraZeneca Pharmaceuticals LP (AZ), whereby AZ was to utilize Ambit's ProteomeScan platform to identify and isolate the protein targets of its portfolio of small molecules.

In November 2001, Medarex Inc and Ambit entered into a multiyear strategic collaboration to jointly develop and commercialize therapeutic monoclonal antibodies, utilizing Medarex's UltiMAb human antibody development system and Ambit's ProteomeScan screening technology. Both companies expected to share equally the costs and revenues associated with the preclinical and clinical development and subsequent commercialization of any resulting products. Additionally, Medarex made a \$1 million equity investment in Ambit.

The company was founded to commercialize technology initially developed in Dr Austin's laboratory in the Chemistry Department at Yale University. This technology, called ProteomeScan, has been exclusively licensed by Ambit Biosciences from Yale University and is the subject of pending US and international patent applications.

FINANCIAL

In February 2013, Ambit filed a registration (form S-1) for an initial public common stock offering on the NASDAQ market.

In November 2012, Ambit raised \$25 million in the first tranche of a new \$50 million stock financing round.

In June 2011, Ambit raised \$30 million from a series D-2 equity financing round.

In November 2010, Ambit filed a registration statement for an IPO with the SEC. Later that month, the IPO was reported to be expected to raise \$86.3 million.

In November 2007, Ambit raised \$49.3 million from a series D equity financing round. Ambit would use the proceeds to advance its pipeline products.

In May 2005, Ambit closed a series C financing, led by Roche, raising a total of \$31 million. The first \$21 million tranche was secured in August 2004.

The company raised \$10 million in November 2001.

In November 2000, Ambit raised \$18.8 million from a series B financing round.

PRODUCT PORTFOLIO DRUGS

PLEASE NOTE: Highest status refers to highest development of that drug for one of the active companies

quizartinib dihydrochloride

Drug Name	quizartinib dihydrochloride
Key Synonyms	quizartinib dihydrochloride, quizartinib
Originator Company	Ambit Biosciences Corp
Active Companies	Astellas Pharma Inc, Ambit Biosciences Corp
Inactive Companies	
Highest Status	Phase 2 Clinical
Active Indications	Solid tumor, Acute myelogenous leukemia
Target-based Actions	Flt3 tyrosine kinase inhibitor, Kit tyrosine kinase inhibitor, PDGF receptor antagonist
Other Actions	Anticancer protein kinase inhibitor, Apoptosis stimulator
Technologies	Oral formulation, Oral liquid formulation, Small molecule therapeutic
Last Change Date	04-Feb-2013

AC-410

Drug Name	AC-410
Key Synonyms	
Originator Company	Ambit Biosciences Corp
Active Companies	Ambit Biosciences Corp
Inactive Companies	
Highest Status	Phase 1 Clinical
Active Indications	Cancer, Inflammatory disease, Autoimmune disease
Target-based Actions	Jak2 tyrosine kinase inhibitor
Other Actions	Anticancer protein kinase inhibitor, Anti-inflammatory
Technologies	Oral formulation, Small molecule therapeutic
Last Change Date	26-Feb-2013

[Return to Table of Contents](#)

AC-708

Drug Name	AC-708
Key Synonyms	
Originator Company	Ambit Biosciences Corp
Active Companies	Ambit Biosciences Corp
Inactive Companies	
Highest Status	Discovery
Active Indications	Cancer, Inflammatory disease
Target-based Actions	CSF-1 antagonist
Other Actions	Bone modulator, Anti-inflammatory, Anticancer protein kinase inhibitor
Technologies	Small molecule therapeutic
Last Change Date	08-Feb-2013

AC-855

Drug Name	AC-855
Key Synonyms	
Originator Company	Ambit Biosciences Corp
Active Companies	Ambit Biosciences Corp
Inactive Companies	
Highest Status	Discovery
Active Indications	Inflammatory disease, Cancer
Target-based Actions	CSF-1 antagonist
Other Actions	Anticancer protein kinase inhibitor, Anti-inflammatory
Technologies	Small molecule therapeutic
Last Change Date	08-Feb-2013
